

The Ultimate Lock

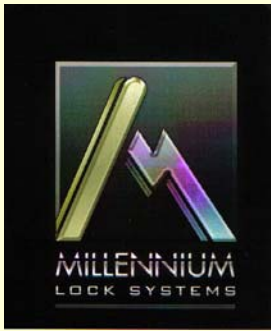

**Making you
Safer**

The Ultimate Lock

The leading
security lock in
the Millennium
Lock family

Business Concept

- To offer a cost effective lock that will provide a superior first line of defense against a burglar trying to enter your home or business
- To enable people to feel secure and protected within their homes
- To establish worldwide global distribution: North & South America, Europe, the Middle East, Asia, Africa and Australia

The Ultimate Lock

- The Ultimate lock
Combines the traditional lock and deadbolt with an innovative locking system
- The lock is secured to both the door frame and jamb; it will take more than 10,000 pounds of force to penetrate the door. That makes this product the strongest locking device you can buy to secure your home

The Ultimate Lock (cont.)

- The patented Ultimate Lock has been endorsed by law enforcement organizations and security experts as a major breakthrough in the door lock and security industry
- The locking system, improved by NASA engineers, uses traditional manufacturing methods and materials, keeping the costs competitive

Features of the Ultimate Lock

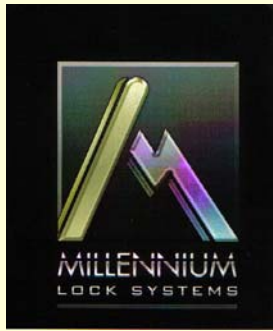

- Durable hardened steel construction
- Steel bar protection from door jamb to door jamb
- Extra hinge support
- Increased strength at the door's pivot point
- Bar bracket
- Lock mechanism with lift bolt and security clamp
- Exterior and interior keyed lock security
- Optional locking pin to further enhance the locks security features
- System mounts to the door and door frame, with hardened screws, giving superior interior protection
- Effective with all varieties of outside locks and deadbolts
- Does not require pre-cut nail or screw holes
- Can be installed during original construction, repair or remodeling
- Functionally effective design has a service life of more than fifty years

Features of the Ultimate Lock (cont.)

- Effective with all varieties of outside locks and deadbolts
- Does not require pre-cut nail or screw holes
- Can be installed during original construction, repair or remodeling
- Functionally effective design has a service life of more than fifty years

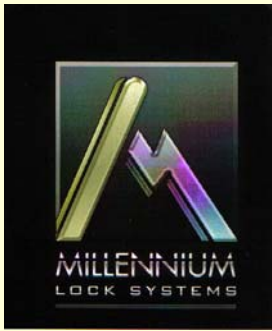

Benefits of the Ultimate Lock

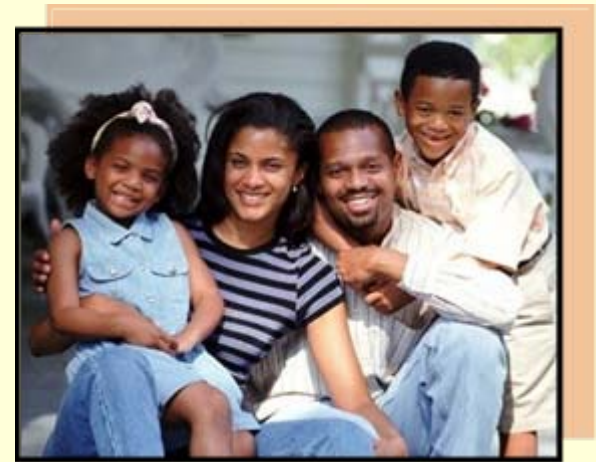

- Quick and easy to install
- Simple to lock or unlock – meets ADA specifications
- Provides solid protection
- Cannot be broken open by burglars without destroying the entire door, frame and jam
- Prevents break-ins
- Prevents assaults
- Protects occupants and contents from break-ins

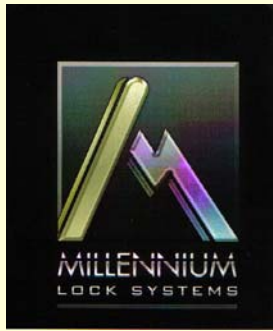

Benefits of the Ultimate Lock (cont.)

- More secure than standard locking methods
- No special installation tools are needed
- Meets all current construction codes
- Reduces or eliminates framing support failure
- Can be used with existing lock and deadbolt hardware
- The Ultimate Lock has an extraordinarily high level of security compared to traditional locking systems
- Competitive pricing makes the Ultimate Lock affordable

Accomplishments of the Ultimate Lock

- The Ultimate Lock holds a United States patent and was designed in cooperation with NASA engineers
- Honeywell international assisted with the biometric application
- The Ultimate Lock is manufactured in the United States
- The R&D team continues to upgrade the Ultimate Lock, developing options that can be retrofitted
- A knowledgeable sales team is ready to demonstrate the Ultimate Lock. The Ultimate Lock was designed for easy installation by the homeowner, however a trained staff of installers may be contracted
